

# Covid19 Workplace Safety

Create a safer environment for  
your team and your customers

**As we're living with Coronavirus, we have to adjust the way we live, work and socialise on a daily basis, whilst keeping staff and customers safe during this period.**

This brochure features a range of Anti-Microbial products, leaflets, posters, signs and floor graphics that can all be used in the workplace, and provides information and advice for managers, staff and your customers.

Branded versions incorporating your company logo and brand colours are also available upon request at no extra cost. Our safety team would be happy to discuss with you and advise you on any changes to your or any existing design, typography and illustrations/icons.

And if there is anything you require that you can't see, please get in touch !

Additional material will be added to our range, as and when updated information becomes available from official sources, so keep checking our website for important updates. **#StaySafe.**

To discuss your order or for some friendly advice from our team, call us on **01284 715296**  
Email us at: [hello@knp.email](mailto:hello@knp.email)

Our **face visors** are personal protective equipment devices used by many workers (e.g. medical, dental and veterinary) for protection of the face, including associated mucous membranes (eyes, nose and mouth), against splashes, sprays and spatter of bodily fluids.

During the Coronavirus crisis it's vital for those working in all service areas to be equipped with face visors to further prevent the spread of the virus.

For **food retailers, vehicle service centres, reception staff, admin support staff in medical centres** it could well become mandatory to wear these for the months to come. Our face screens are made of **84% recycled** plastic so we're keeping to our sustainable ethos too!

## Face Safety Visors & Sanitiser Station

HS01

Our **Foot Operated Hand Sanitiser Stations** can be positioned at all site entrance points and points of hand contact, i.e. offices, toilets or catering facilities and near tools or ladders. These play an essential role in combating the spread of coronavirus within a workplace or office and most importantly help keep your colleagues safe and well.

Every sanitising unit comes with a **FREE** A4 poster of your choice.

**KNP Hygiene Guards** are designed to protect front-line key workers from Covid-19 and other hazards. As an airborne virus, Covid-19 can easily spread by infected droplets in sneezes, coughs or breath entering the eyes, nose or mouth. A partition between you (or your team) and an infected person reduces the chance of catching the disease.

Our hygiene guards are hard coated as standard with a clear coating that provides excellent protection against abrasion and chemicals allowing for easy cleaning and longevity. All of our screens are also have an **Anti-Microbial coating** which incorporates the unique **MicroGuard™** hard coating to add extra protection against infection.

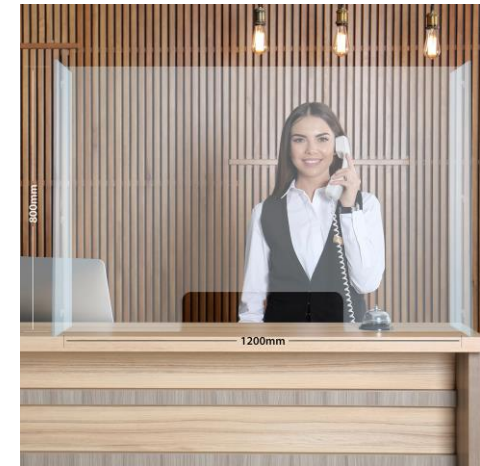

Available as a standard free standing design or an easy assembly clamp option to secure your screen, in various sizes. Together with fully bespoke solutions to meet the needs of any application including healthcare, retail and industries. Common uses for our screens are **reception, payment tills** and **desk partitions**. Each screen comes with a **FREE** face visor.

TS01

TS02

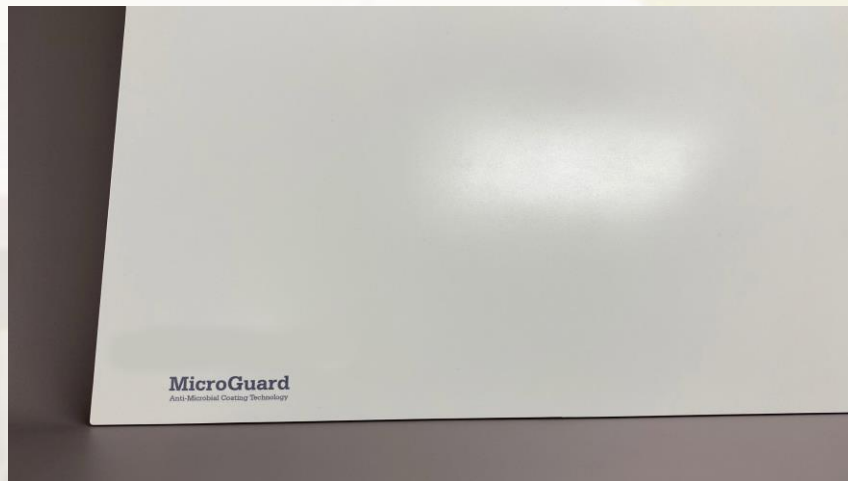

TS03

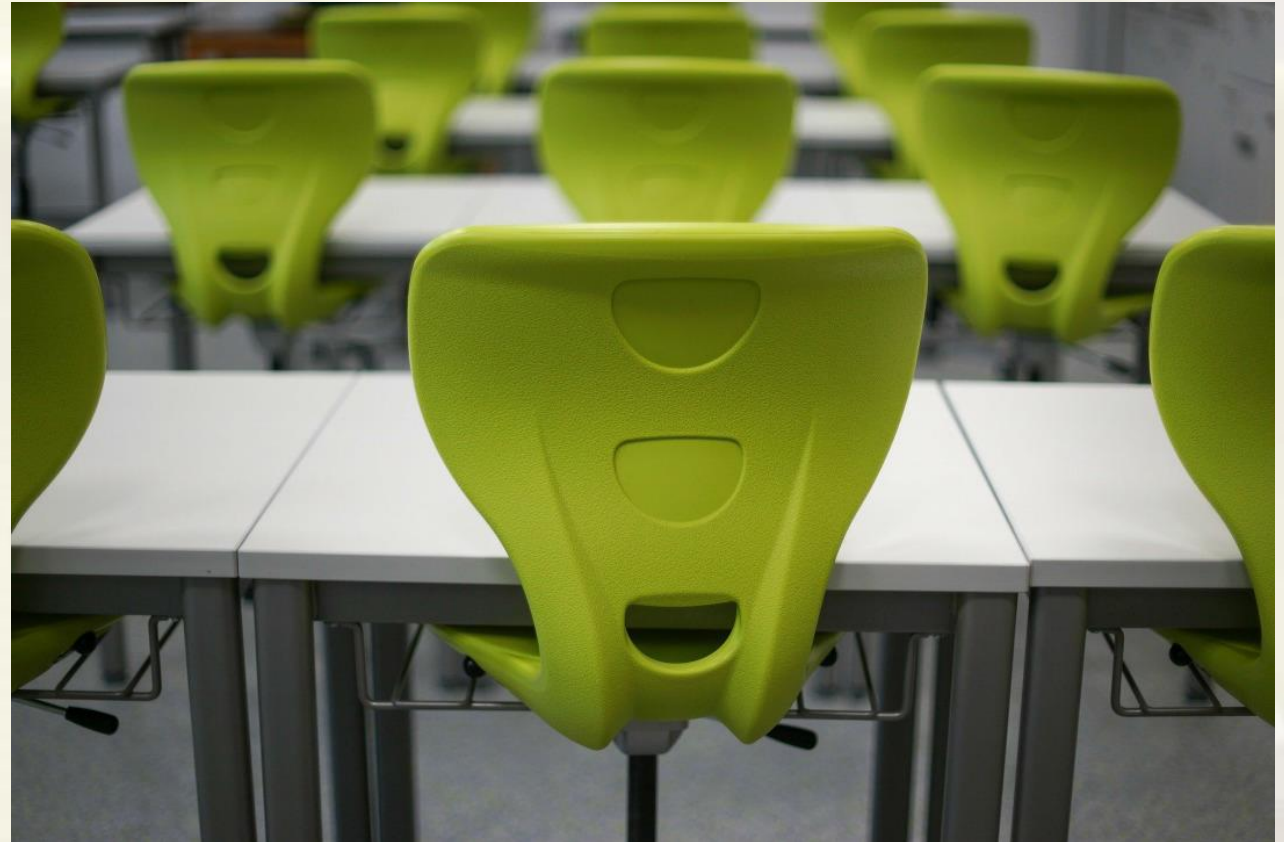

**Desk safety protectors** are coated with a permanent Anti-Microbial property incorporating Silver Ion technology and are made from polycarbonate to deliver a scratch resistant and chemical resistant hard coating.

All desk tops are applied using non-permanent self adhesive tape which is easily removed with soap and water to help protect your existing desk.

You can have your own brand or message printed to give show your staff that extra caring touch. All desk protectors are bespoke and made to fit your desk.

AMB01

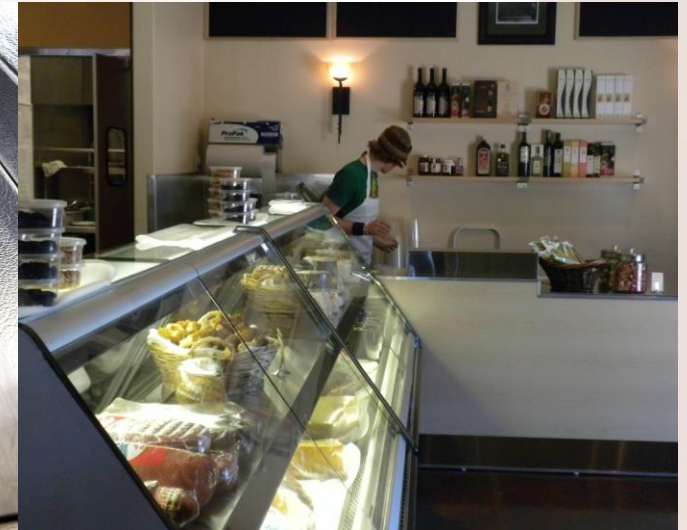

### SteriMax Anti-Microbial Copper Film

is designed for application to high traffic touchpoints such as handles, railings, buttons and screens, and can be used indefinitely depending on the level of wear and tear.

It constantly exterminates and prevents the spread of harmful microbes, yet is harmless to humans and the environment.

This 150mic film, comes in a removable adhesive and non-adhesive version on a roll.

Please call **01284 715296** or email the team at [hello@knp.email](mailto:hello@knp.email) for more details and prices

Door Openers

AMB01

Suitable for use on most door handles:  
Round, Oval or Square section

Comes with 3mm Allen Key for easy installation

Easy to clean made from polyamide, reinforced glass fibre

Standard colour - Grey  
Available in different colours to order.  
Add your logo - available on high quantity order - contact us to enquire.

Everyone touches **doors** and **door handles**. And as a result they are particularly affected by germs - especially in high traffic areas. Use our **Anti – Microbial coated** hands-free door openers to simply and effectively reduce the spread of germs and viruses in all environments such as **offices, restaurants, shops, factories, hospitals** and **care homes**.

They're easy to install and clean, and will fit most door handles.

**Correx** can withstand bricks, mortar, dropped tools and much more. It's completely water proof AND chemical resistant. Paint spills, drinks, glue and chemicals are no problem. It's light weight but incredibly strong and easy to install !

**Dibond** is mainly used for making advertising signs and displays and weathers extremely well, with high UV resistance and excellent stability within a range of temperatures. The perfect metal replacement, Dibond offers the same metallic finish without the weight or the risk of rusting from some metals.

**Entrance and Exit Only Posters** do what they say!  
Available as *laminated & self adhesive posters, correx, foamex and dibond* materials for internal and external use. We can provide these in various substrates and sizes to suit your needs.
